

# ATONCE NOTIFICATION SYSTEM

## Notification of Alert or Emergency Conditions

*Alston Tascom's Online Notification Center (ATONCE)* is a crucial component to any facility's emergency and disaster plan. *ATONCE* provides your facility or organization the following:

- Automates any manual notification process of your organization, staff or the community
- Contacts personnel through all communications media available: Telephones, Cell Phones, TDD/TTY Phones, Text Pagers, Numeric/Tone Pagers, E-mail, Fax, Wireless Personal Digital Assistants (PDA) and Human Voice
- Delivers incident-specific information or potentially life-saving instruction
- Qualifies individuals available for response efforts
- Repeats the information
- Accepts recipient feedback
- Provides comprehensive reports
- Database encrypted

*ATONCE's* primary objectives are:

- Reach the Right People at the Right Time
- Do this Quickly, Efficiently, and Accurately
- Provide Detailed Accountability of Notification

## How It Works

1,000 people can receive a fifteen-second message in 22 minutes over a T1 circuit, or 100 people can receive a fifteen-second message in 13 minutes over 4 telephone lines. The system can contact devices until the user acknowledges that the message was received.

## Configurations

Systems can be configured with up to 20 T-1's or 480 in-or-out ports per server for simultaneous notification. Servers are configured with Hot swap Raid Disk Drives, and Redundant Hot swap Power Supplies. Supports local and remote User/Admin positions up to 48 stations. The system can be administrated via the web, remote access, dialup and locally. All data and voice transactions are logged to the database.

## Benefits

- Rapid exchange of information
- Appropriate and timely response
- More efficient use of existing communications technologies
- Improved Communication at All Levels
- Faster Deployment of First Responders, emergency response teams, riot teams, SWAT teams, etc.
- Broader-reaching solution for warning communities-at-risk
- Frees your staff to focus on the situation at hand, rather than coordination of message delivery
- Immediate proof of notification for complete audit trail and reporting functions

## A Full Featured System

*ATONCE* provides your facility or organization with a full-featured notification system. *ATONCE* features include:

**Standard Notification** - used for communications such as:

- Public service announcements
- Weather conditions
- Surveys
- Policy changes
- Special events
- Routine communications
- Other general notifications

**Priority Notification** - A Priority Notification takes precedence over all other notifications. It is used for emergency conditions such as natural disasters, facility emergency situations, hazardous waste spills, and severe weather conditions.

**GIS and Location Based Notification** - Notifications can be distributed according to geographical representation contact locations either internal or external to your facility. Notifications can be established to contact selected personnel by geographical location, filtered by zip code, telephone exchange or radius on a map.

**Multi-Language Notification Support** - Notification messages can be made in an unlimited number of languages per notification.
